ABSTRACT

The Teacher Followup Survey (TFS) is a 1-year follow-up of a sample of teachers who were originally selected for the Teacher Questionnaire in the Schools and Staffing Survey (SASS) an integrated set of surveys of public and private schools. There have been three data cycles for the SASS, and three for the TFS. The data in this report links responses from the 1994-1995 school year to characteristics of those same teachers who participated in the 1993-1994 SASS. This data file user's manual enables the user to access and understand the public use files of the TFS for 1994-1995. The guide contains these chapters: (1) "Overview"; (2) "Sample Design"; (3) "Data Collection"; (4) "Edit Procedures"; (5) "Response Rates"; (6) "Imputation"; (7) "Weighting"; (8) "Variance Estimation"; (9) "Reinterview Program"; (10) "Confidentiality Protection Measures"; (11) "Changes to TFS Content from 1991-92 to 1994-95"; (12) "Caution Concerning the Measurement of Change Using 1991-92 and 1994-95 TFS"; and (13) "User Notes and Comments." Five appendixes, representing the majority of the document, contain the questionnaires for current and former teachers, the crosswalk for previous surveys, industry and occupation codes, and the public-use codebook. The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

Introduction

How the Teacher Followup Survey is related to the Schools and Staffing Survey

The Teacher Followup Survey is a one-year followup of a sample of teachers who were originally selected for the Teacher Questionnaire in the Schools and Staffing Survey. The Schools and Staffing Survey is an integrated set of surveys of public and private schools, principals, teachers, and public school districts throughout the United States of America. There have been three data cycles for the Schools and Staffing Survey, and likewise, three Teacher Followup Surveys.

The 1994-95 Teacher Followup Survey data in this report links responses from the 1994-95 school year to characteristics of those same teachers who participated in the 1993-94 school year SASS. Within this report, there are some data that are drawn directly from the 1993-94 SASS. These data are termed "base year" because the SASS sample is the "base" for the teachers who are selected for the Teacher Followup Survey. Base year characteristics include personal and professional descriptors of the teacher (age, sex, race, field of teaching assignment), as well as characteristics of the school in which the teachers worked in 1993-94: whether the school was public or private, region of the country in which the school is located, and the community type or locale of the school. These "base year" characteristics provide the context for the data collected in the Teacher Followup Survey.

Purpose of the Teacher Followup Survey

How do teachers who remain teaching at the same school from year to year ("stayers") compare with those who don't? How many teachers move from one school to another ("movers")? What percentage of teachers are leaving the profession between one year and the next ("leavers")? These types of questions can be answered with data from the Teacher Followup Survey. For teachers who leave the profession, TFS asks about their occupational status (are former teachers working, retired, or caring for family members?) or whether they are seeking further education, and reasons for leaving teaching, as well as recommendations for how schools might retain teachers. Those who remain in teaching are asked about changes in teaching assignment, opinions about retaining teachers, and retirement plans. Both current and former teachers are asked for their current family income. Teachers who move from one school to another are asked to describe the type of school to which they moved. Data from the Teacher Followup Survey can be used to compare public and private teachers' job satisfaction, as well as movement within and out of the teaching profession.

I. Overview

The 1994-95 Teacher Followup Survey (TFS) was sponsored by the National Center for Education Statistics (NCES) of the U.S. Department of Education to update information on teacher attrition and career patterns. The U.S. Bureau of the Census collected and processed the data.

The TFS is a survey of elementary and secondary school teachers who participated in the Schools and Staffing Survey (SASS)¹ and is conducted in the school year following the SASS data collection. The sample for the 1994-95 TFS was selected from those teachers who participated in the 1993-94 SASS; it consisted of all who left teaching within the year after SASS was administered and a subsample of those who continued teaching.

A. Purpose of the Survey

The major objectives of TFS are to:

- Provide estimates of teacher attrition rates;
- Examine the characteristics of those who stay in the teaching profession and those who leave;
- Obtain data on occupations or other activities for those who leave teaching and career information for those who are still teaching;
- Update information on education, other training, and career plans;
- Collect data on attitudes about the teaching profession and job satisfaction.

Congress, state education departments, federal agencies, private school associations, teacher associations, and educational organizations have used data from the 1988-89 and 1991-92 TFS surveys.

B. Periodicity of Survey

The TFS was conducted in the 1988-89, 1991-92, and 1994-95 school years (after the 1987-88, 1990-91, and 1993-94 administrations of SASS, respectively). NCES currently plans to conduct the next survey in the 1999-2000 school year; it will collect data from a subsample of teachers who participate in the 1998-99 SASS.

C. Target Populations

The target population for the 1994-95 TFS was the universe of elementary and secondary school teachers who taught in schools that had a first grade and/or higher in the

¹For a complete description of the 1993-94 Schools and Staffing Survey, see 1993-94 Schools and Staffing Survey: Data File User's Manual, Volume 1: Survey Documentation, by Gruber, K., Rohr, C., and Fondelier, S., U.S. Department of Education, National Center for Education Statistics (NCES 96-142-I).

United States during the 1993-94 school year. This population was divided into two components—those who left teaching after the 1993-94 school year (former teachers) and those who continued teaching (current teachers).

D. Definitions

The following terms are used in this publication and are defined as they apply to TFS:

Teacher. A teacher is any full-time or part-time school staff member who teaches one or more regularly scheduled classes in any of grades K-12 (or comparable ungraded levels). In addition to regular full-time teachers, the following types of teachers are also included: (1) itinerant teachers, (2) long-term substitutes who fill the role of a regular teacher on a long-term basis, (3) administrators, counselors, librarians, or other professional or support staff who teach **any** regularly scheduled classes, and (4) other part-time teachers.

Leavers. Teachers who left the teaching profession after the 1993-94 school year.

Movers. Teachers who were still teaching in the 1994–95 school year but had moved to a different school after the 1993–94 school year.

Stayers. Teachers who were teaching in the same school in the 1994–95 school year as in the 1993–94 school year.

Out-of-Scope TFS teachers. Teachers who left the United States or who died.

The following definitions were used in the 1993–94 SASS; they describe variables included on each TFS respondent's record to identify the school where he/she taught during the 1993–94 school year. They are also used in this publication.

Census region. The four Census regions are:

Northeast - Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania

Midwest - Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas

South - Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas

²This definition was revised for the 1993-94 SASS and differs from the one used for previous administrations of SASS and TFS. In previous SASS and TFS surveys, a teacher was defined as a school staff member whose **primary assignment** was teaching in any of grades K-12 (or comparable ungraded levels). School staff whose primary assignment was something other than teaching were excluded, even if they taught some regularly scheduled classes.

West - Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, Hawaii

Common Core of Data (CCD). The Common Core of Data (CCD) is a group of surveys that collect public elementary and secondary education data from the 50 states, the District of Columbia, and the U.S. territories (American Samoa, Guam, Puerto Rico, Virgin Islands, Northern Marianas). CCD is an annual survey that collects information about staff and students in public schools at the school, district, and state levels. Revenue and expenditure data are also collected at the state level.

Local education agency (LEA). LEAs, or public school districts, are government agencies that employ elementary or secondary teachers and are administratively responsible for providing public elementary/secondary instruction and educational support services. Included are education agencies that do not operate schools but employ teachers, e.g., regional cooperatives that employ special education teachers who teach in schools in more than one school district.

School, alternative. Alternative schools serve students whose needs cannot be met in a regular, special education, or vocational school. They provide nontraditional education and may serve as an adjunct to a regular school. They fall outside the categories of regular, special education, and vocational education, although they may provide similar services or curriculum. Some examples of alternative schools are those for potential drop-outs, residential treatment centers for substance abuse (if they provide elementary or secondary education), and schools for chronic truants.

School, BIA. BIA schools are schools funded by the Bureau of Indian Affairs, U.S. Department of Interior. These schools may be operated by the BIA, a tribe, a private contractor, or an LEA (or school district).

School, combined. A combined school has one or more of grades K-6 and one or more of grades 9-12; for example, schools with grades K-12, 6-12, 6-9, or 1-12 are classified as combined schools. Schools in which all students are ungraded (i.e., not classified by standard grade levels) are also classified as combined.

School, elementary. A school is classified as elementary if it has one or more of grades 1-6 and does not have any grade higher than grade 8; for example, schools with grades K-6, 1-3, or 6-8 are classified as elementary schools.

School, private. A private school is a school that is not supported primarily by public funds (i.e., it is not a public school). It must provide instruction for one of more of grades 1 through 12 (or comparable ungraded levels), have one or more teachers and be located in a building that is not used primarily as a private home. Organizations or institutions that provide support for home schooling but do not offer classroom instruction for students are **not** included.

School, public. A public school is an institution that provides educational services for at least one of grades 1 through 12 (or comparable ungraded levels), has one or more teachers, is located in one or more buildings, and is supported primarily by public

funds. State schools (e.g., schools for the deaf or the blind), schools in juvenile detention centers, and schools located on military bases and operated by the Department of Defense are included.

School, secondary. A school is classified as secondary if it has one of more of grades 7–12 and does not have any grades lower than grade 7; for example, schools with grades 9–12, 7–8, 10–12, or 7–9 are classified as secondary schools.

School, special education. Special education schools provide educational services to students with special physical or mental needs, i.e., students with mental disabilities (such as mental retardation or autism), physical disabilities (such as hearing-impairment), or learning disabilities (such as dyslexia).

School, vocational. Vocational schools primarily serve students who are being trained for semi-skilled or technical occupations.

Typology, private school. Private schools were assigned to one of three major categories and, within each major category, one of three subcategories. The categories and subcategories are:

- Catholic (1) parochial, (2) diocesan, and (3) private;
- Other religious (4) affiliated with a conservative Christian school association, (5) affiliated with a national denomination, and (6) unaffiliated;
- Nonsectarian (7) regular, (8) special program emphasis, and (9) special education.³

Teacher, itinerant. An itinerant teacher teaches at more than one school, e.g., a music teacher who teaches three days per week at one school and two days per week at another.

Ungraded students. Ungraded students are those who are not assigned to a particular grade level (kindergarten, first grade, second grade, etc.); for example, special education centers and alternative schools often classify their students as ungraded. Students in Montessori schools are also considered ungraded if the school assigns them to "primary" and "intermediate" levels instead of specific grades.

³See M. McMillen and P. Benson, *Diversity of Private Schools*, Technical Report, NCES 92-082 (Washington, D.C.: U.S. Department of Education, National Center for Education Statistics, 1991).

II. Sample Design

A. SASS Sampling Frames

1. Public Schools

The public school sampling frame was based on the 1991-92 school year Common Core of Data (CCD). The CCD is collected annually by NCES from all state education agencies and is believed to be the most complete public school listing available. The frame includes regular public schools, some schools on Department of Defense military bases, and nonregular schools such as special education, vocational, and alternative schools. The frame also included 176 Bureau of Indian Affairs (BIA) schools.

2. Private Schools

The sampling frame for private schools was the 1991-92 Private School Survey (PSS).⁴ This data collection used two components to develop estimates of the number of private schools in the United States. A *list frame* was the primary private school frame and an *area frame* was used to identify schools not on the list frame and thereby compensate for the undercoverage of the list frame.

List Frame

The list frame used for the 1993-94 SASS private school sample was the same list used for the 1991-92 PSS. It consisted of approximately 25,051 schools from the PSS universe, which was updated in the spring of 1993 by using lists from 24 private school associations.

Area Frame

The SASS area frame consisted of a list of private schools that had not been included on the PSS universe and had not been reported by private school associations during the list frame updating operation. These schools were located in 123 selected PSUs⁵ throughout the United States.

For more information, see the technical report 1993-94 Schools and Staffing Survey: Sample Design and Estimation, by R. Abramson, C. Cole, S. Fondelier, B. Jackson, R. Parmer, S. Kaufman, (NCES 96-089).

Duplicate schools, as well as schools that did not meet the criteria for being inscope for the survey (e.g., adult education centers, schools where the highest grade was

⁵A PSU is a primary sample unit, which is a geographic area consisting of one or more contiguous counties or an independent city.

⁴U.S. Department of Education, National Center for Education Statistics, *Private School Universe Survey*, 1991–92, (E. Gerald, M. McMillen, S. Kaufman) NCES 94-350.

prekindergarten or kindergarten, and tutoring services) were eliminated from the files before sampling. The resulting number of public schools on the 1993-94 public school frame was 82,746 (9,956 were sampled); the resulting number of private schools on the 1993-94 private school universe was 25,051 (3,315 were sampled). The list frame sample for 1993-94 SASS consisted of 3,162 schools. Additional duplicate private schools were discovered on the PSS after sampling had taken place; these schools received a weighting adjustment to account for their increased probability of selection. Additional out-of-scope public and private schools were detected after processing the sample schools' SASS school questionnaires. These schools were eliminated from further processing of the school samples and are not part of any SASS estimates of the number of schools.

B. SASS Stratification

1. Public Schools

The first level of stratification divided the universe of public schools into four types: (A) BIA (Bureau of Indian Affairs) schools; (B) Native American schools (schools with 19.5 percent or more Native American students); (C) schools in Delaware, Nevada, and West Virginia (where it was necessary to implement a different sampling methodology to select at least one school from each LEA in the state because of the small number of LEAs); and (D) all other schools (i.e., all schools not included in A, B, or C).

For the second level of stratification, the type B schools were stratified by Arizona, California, Montana, New Mexico, Washington, and all other states (except Alaska, since most Alaskan schools have high Native American enrollment). The type C schools were stratified first by state and then by LEA. The type D schools were stratified by state (all states and the District of Columbia, except Delaware, Nevada, and West Virginia).

Within each second level of stratification, regular schools were divided into three grade level strata (elementary, secondary, and combined schools), defined as follows:

- Elementary Lowest Grade ≤ 6 and Highest grade ≤ 8
- Secondary Lowest Grade ≥ 7 and Highest grade ≤ 12
- Combined Lowest Grade ≤ 6 and Highest grade > 8

Nonregular schools such as special education, vocational, technical, adult education (if part of in-scope school) or alternative/continuation schools were classified as combined schools.

2. Private Schools

For list frame private schools, the frame was partitioned into an initial set of 228 cells. The first level of stratification was school association membership:

- (1) Military membership in the Association of American Military Colleges and Schools;
- (2) Catholic affiliation as Catholic or membership in the National Catholic Educational Association or the Jesuit Secondary Education Association;
- (3) Friends affiliation as Friends or membership in the Friends Council on Education:
- (4) Episcopal affiliation as Episcopal or membership in the National Association of Episcopal Schools;
- (5) Hebrew Day membership in the National Society for Hebrew Day Schools;
- (6) Solomon Schechter membership in the Solomon Schechter Day Schools;
- (7) Other Jewish other Jewish affiliation;
- (8) Missouri Synod membership in the Lutheran Church, Missouri Synod school association;
- (9) Wisconsin Synod membership in the Evangelical Lutheran Church Wisconsin Synod school association or affiliation as Evangelical Lutheran
 Wisconsin Synod;
- (10) Evangelical Lutheran membership in the Association of Evangelical Lutheran Churches school association or affiliation as Evangelical Lutheran Church in America:
- (11) Other Lutheran other Lutheran affiliation;
- (12) Seventh-Day Adventist affiliation as Seventh-Day Adventist or membership in the General Conference of the Seventh-Day Adventist Church;
- (13) Christian Schools International membership in Christian Schools International:
- (14) American Association of Christian Schools membership in the American Association of Christian Schools;
- (15) National Association of Private Schools for Exceptional Children membership in the National Association of Private Schools for Exceptional Children;
- (16) Montessori membership in the American Montessori Society or other Montessori association;
- (17) National Association of Independent Schools member of the National Association of Independent Schools;
- (18) National Independent Private School Association member of the National Independent Private Schools;
- (19) All else member of any other association specified in the PSS or affiliated with a group not listed above or not a member of any association.

Within each association membership, schools were stratified by grade level (elementary, secondary, or combined). Within association/grade level, schools were stratified by four Census regions (Northeast, Midwest, South, or West).

C. TFS Stratification and Sample Allocation

The 1994-95 TFS is a survey of approximately 7,200 teachers interviewed in the 1993-94 SASS Teacher Survey. As described earlier, the purpose of the 1994-95 TFS was to measure teacher attrition rates one year after the 1993-94 SASS data collection. In SASS, schools were selected first. Next, teachers were selected within each sampled school. The TFS teachers were selected from the SASS teacher sample. The TFS sample is a stratified sample that was allocated to allow comparisons of stayers, movers, and leavers within sector (public/private), experience groups, and level. Therefore, for the TFS, the responding 1993-94 SASS teachers were stratified by four variables (sector, teacher status, experience, teaching level) in the order shown:

1) Sector: (Public/Private School Indicator)

Public - teachers who taught in a public school system in the 1993-94 school year;

Private - teachers who taught in a private school in the 1993-94 school year;

2) Teacher status:

Leavers - teachers in the 1993-94 school year who left the teaching profession prior to the 1994-95 school year;

Stayers - teachers in the 1993-94 school year who were still teaching in the same school in the 1994-95 school year as they were in the previous school year;

Movers - teachers in the 1993-94 school year who were still teaching in 1994-95, but who were in a different school in the 1994-95 school year;

Don't know - teachers whose status was unknown (or was not reported) in 1994-95 by staff at the school in which they taught in 1993-94.

3) Experience: (New/Experienced Teacher Indicator)

New - teachers who had three years or less teaching experience at the end of the 1993-94 school year;

Experienced - teachers who had more than three years of experience at the end of the 1993-94 school year;

The teacher status and the teacher's teaching experience was defined by the school.

4) Teaching level:

Elementary - teachers who taught elementary students in the 1993-94 school year regardless of the level of the school (elementary, secondary, or combined) in which they taught;

Secondary - teachers who taught secondary students in the 1993-94 school year regardless of the level of the school (elementary, secondary, or combined) in which they taught.

The final TFS sample allocation is summarized in Table II-1.

Table II-1.—TFS sample allocation

Table II-1.—TFS sample a	Total	New	Experienced
Public	5,075	1,640	3,435
eavers			
Total	1,784	264	1,520

Movers	227	68	159
Stayers	614	225	389

Due to rounding, subtotals may not add to the total.

D. SASS Sample Selection

1. Public Schools

Before the sample of public schools was selected, the schools within each stratum were sorted. To facilitate the calculation of LEA weights, it was important to keep all schools within a stratum and Local Education Agency (LEA) together. To accomplish this, the first three digits of the ZIP code of all schools within a stratum and LEA were set equal to those of the first school in the stratum and LEA.

After the ZIP code was recoded, non-BIA⁶ schools within each stratum were sorted by the following variables:

- 1) State;
- 2) LEA metro status:
 - 1 = Central City of a Metropolitan Statistical Area (MSA)
 - 2 = MSA, not Central City
 - 3 = Outside MSA
- 3) Recoded LEA ZIP Code (The first three digits);
- 4) CCD LEA ID number;
- 5) Highest grade in school;
- 6) School percent minority:
 - 1 = < 5.5 percent or unknown
 - $2 = \ge 5.5$ percent and < 20.5 percent
 - 3 = 20.5 percent and < 50.5 percent
 - 4 = 50.5 percent or more;
- 7) School enrollment; and
- 8) CCD School ID (the CCD ID of the last school used.)

Within each stratum, non-BIA schools were systematically selected using a probability proportionate to size algorithm. The measure of size used was the square root of the number of teachers in the school as reported on the CCD file. Any school with a measure of size larger than the sampling interval was excluded from the probability sampling process and included in the sample with certainty. This selection process produced a sample of 9,780 non-BIA public schools.

2. Private Schools

Within each stratum, private schools in the list frame were sorted on the following variables:

⁶BIA schools were not sorted since they were designated to be in sample with certainty. All 176 BIA schools were in the 1993-94 SASS school sample.

- 1) State;
- 2) Highest grade in school;
- 3) Urbanicity:
 - 1 = Large Central City
 - 2 = Mid-size Central City
 - 3 = Urban Fringe of Large City
 - 4 = Urban Fringe of Mid-size City
 - 5 = Large Town
 - 6 = Small Town
 - 7 = Rural
- 4) ZIP Code (The first two digits);
- 5) 1991–92 PSS enrollment;
- 6) PIN number (a unique number that identifies the school on the PSS).

Within each stratum, private schools in the list frame were systematically selected using a probability proportionate to size algorithm. The measure of size used was the square root of the 1991–92 PSS number of teachers in the school. Any school with a measure of size larger than the sampling interval was excluded from the probability sampling process and included in the sample with certainty.

3. Teachers

Selecting the teacher sample in both public and private schools involved the following steps:

- The selected schools were asked to provide teacher lists;
- From the lists, 56,736 public school teachers and 11,548 private school teachers were selected.

The public and private teacher sample selections are described together because identical methodologies were used. The only differences were in the average number of teachers selected within a school.

Teacher Frame

Each selected school was asked to provide a list of their teachers with selected information for each teacher. Nine percent of the private schools and four percent of the public schools did not provide teacher lists. A factor in the teacher weighting system was used to adjust for these nonparticipant schools.

The sample schools were asked to provide the following information for each teacher listed:

• Whether the teacher was new or experienced, where "new" was defined as three years or less of teaching experience and

"experienced" was defined as having more than three years of experience;

- Race/ethnicity;
- Whether teacher taught bilingual or English as a Second Language (ESL) classes;⁷
- Main subject taught (General elementary, special education, and all others for elementary level teachers; math, science, English, social studies, vocational education, special education, and all others for secondary teachers.)

The above information for each teacher in a selected SASS school comprised the school teacher frame.

Within each selected school, teachers were stratified into one of five teacher types in the following hierarchical order:

- 1) Asian or Pacific Islander (API)
- 2) American Indian or Aleutian or Eskimo (AIAE)
- 3) Bilingual/ESL
- 4) New
- 5) Experienced

Within-School Teacher Allocation

First, the total number of sample teachers to be selected for each school without regard to strata was calculated assuming no teacher oversampling for new teachers. Then, to allocate across the strata, public school teachers were allocated to the new and experienced categories proportional to their numbers in the school. However, for private teachers, it was decided to oversample new teachers to ensure that there would be a sufficient sample of new teachers in the TFS. (This was also done in 1990–91 SASS.)

Asian or Pacific Islander, American Indian or Aleutian or Eskimo, and bilingual teachers were oversampled at a rate to ensure a set number of each group was selected. To make sure a school was not overburdened, the maximum number of teachers per school was set at 20. When the number of sample teachers exceeded 20 in a school, the Asian or Pacific Islander, American Indian or Aleutian or Eskimo, and bilingual teachers were proportionally reduced to meet the maximum requirement.

Within each teacher stratum, secondary teachers were sorted by teacher's main subject taught (as reported by the principal on the SASS Teacher List); and

⁷In bilingual classes, subject matter (science, math, social studies, etc.) is taught by using a language other than English. In ESL classes, English is taught to students whose primary language is not English.

elementary teachers were sorted by general elementary, special education, or other teaching assignment. When combined schools had both elementary and secondary teachers, the teachers were sorted by grade level/main subject taught. This method was used to assure a good distribution of teachers by main subject taught.

Within each school and teacher stratum, teachers were selected systematically with equal probability.

A total of 68,284 teachers were selected for SASS (62,770 new and experienced; 1,735 Asian Pacific Islander; 1,661 American Indian or Aleutian or Eskimo; and 2,118 bilingual/ESL). Table II-2 shows the number of selected teachers in SASS sample by teacher type and sector.

Table II-2.—Number of selected teachers in SASS sample, by teacher type and sector

Teacher type	Public	Private	Total
American Indian/Aleut/Eskimo	1,525	136	1,661
Asian/Pacific Islander	1,483	252	1,735
Bilingual/ESL	2,024	94	2,118
New	4,799	2,182	6,981
Experienced	46,905	8,884	55,789
Total	56,736	11,548	68,284

E. TFS Sample Selection

Sorting. Within each public TFS stratum, teachers who responded to the 1993-94 SASS Teacher Survey were sorted by teacher subject, Census region, urbanicity, school enrollment, and SASS teacher control number. Within each private TFS stratum, responding teachers were sorted by teacher subject, association membership (list frame), affiliation (area frame), urbanicity, school enrollment, and SASS teacher control number.

Sample Selection. After they were sorted, teachers were selected within each stratum using a probability proportional to size sampling procedure. The measure of size was the 1993-94 SASS intermediate teacher weight, which is the product of the Basic Weight, Sampling Adjustment Factor, School Nonresponse Factor, Teacher Noninterview Factor, and the First-Stage Ratio Adjustment Factor. (See Table II-1 for more details on TFS Sample allocation.)

For more information about weights and estimation in SASS, see the technical report 1993-94 Schools and Staffing Survey: Sample Design and Estimation, by R. Abramson, C. Cole, S. Fondelier, B. Jackson, R. Parmer, S. Kaufman, (NCES 96-089).

III. Data Collection

A. Time Frame of the Survey

The Bureau of the Census collected the 1994-95 TFS data during the 1994-95 school year. Table III-1 summarizes the specific data collection activities and the time frame in which each occurred.

Table III-1.—Data collection time schedule

Activity	Month of Activity
Advance letters mailed to LEAs and state administrators	August 1994
Teacher Status Forms (TFS-1) and letters mailed to sample schools	September 1994
Reminder postcards mailed to sample schools	September 1994
Telephone followup of Teacher Status Forms not returned by schools	October-November 1994
Initial mailing of leaver/stayer questionnaires (TFS-2 and TFS-3)	January 1995
Second mailing of leaver/stayer questionnaires (TFS-2 and TFS-3)	February 1995
Telephone followup of mail questionnaire nonrespondents	March-May 1995

B. Data Collection Procedures

The U.S. Bureau of the Census collected TFS data in two phases:

Phase 1 - In September 1994, the Census Bureau mailed teacher status forms (TFS-1) to schools that had provided lists of teachers for 1993–94 SASS. On this form, the school principal (or other knowledgeable school staff member) was asked to report the current occupational status of each teacher who participated in the 1993–94 SASS, by indicating whether he/she was still at the school in a teaching or nonteaching capacity, or had left the school to teach elsewhere or for a non-teaching occupation. One week after the TFS-1 mailout, reminder postcards were mailed to the sample schools. In October and early November, Census interviewers telephoned schools that had not returned the TFS-1 to obtain the requested information.

If the school staff indicated a sample teacher had moved, the Census Bureau also tried to obtain address correction information for the sample teacher's home address through the post office.

Phase 2 - In January 1995, the TFS questionnaires were mailed to selected teachers and former teachers. The Questionnaire for Former Teachers (TFS-2) was sent to sample persons reported by school administrators as having *left* the teaching profession. The Questionnaire for Current Teachers (TFS-3) was sent to sample persons who were reported as still teaching at the elementary or secondary level. When home addresses were available, the questionnaires were mailed there. Otherwise, they were mailed to the sample teacher's 1993-94 school.

In February, the Census Bureau mailed a second questionnaire to each sample person who had not returned the first questionnaire. Also, for those who returned the first form and indicated that it did not apply to them (because their status was incorrectly reported by their 1993–94 school), the appropriate questionnaire was mailed to them. For example, if a sample person who was teaching in another school received the questionnaire for former teachers (TFS-2), he/she was instructed to return the questionnaire; the Census Bureau sent the correct questionnaire (TFS-3 for current teachers) to the respondent during the second mailout.

In late March 1995, Census interviewers began calling sample persons who had not returned a mail questionnaire. In addition to these nonresponse followup cases, some "nonmailable" cases (cases with incomplete addresses) were assigned for telephone followup. If the interviewers were unable to contact a sample teacher through a contact person (two contact persons had been listed by the sample teacher on the SASS form as knowing how or where to get in touch with him or her) or through directory assistance, they called the sample person's 1993–94 school to obtain information about the person's current address or employer. Telephone followup of nonrespondents ended in May 1995.

During the telephone followup, the interviewers used form TFS-4, Telephone Questionnaire for the Teacher Followup Survey 1994-95, to collect the data. This form was a combination of the TFS-2 and the TFS-3 questionnaires; i.e., data for a current or a former teacher could be recorded on this single form.

IV. Edit Procedures

A. Clerical Edit

Questionnaires returned by individual respondents and those completed by Census interviewers during telephone followup were sent to the Census Bureau processing center in Jeffersonville, Indiana. Upon receipt, clerks assigned codes to each questionnaire to indicate its status—e.g., complete interview, refusal, deceased. Then they performed a general clerical edit that included reviewing all entries for legibility and making corrections, e.g., changing "one" to "1" and rounding fractions to whole numbers. For the TFS-2 (Questionnaire for Former Teachers), the clerks also assigned industry and occupation codes⁸ to the respondent's current job (questionnaire item 3). For TFS-3 (current teachers) respondents teaching in a different state, they assigned a state FIPS code to the respondent's new state (questionnaire item 13).

After the clerical edit, the questionnaires were batched by type and interview status (i.e., interviews, noninterviews, out-of-scope for survey) for data keying. Data entry personnel were instructed to correct all errors identified during the keying operation

⁸The lists of industry and occupation codes used for TFS-2 item 3 are provided in appendix D of this publication.

and to refer problem cases to their supervisor. To assure the quality of the data, all keying was independently verified at the 100 percent level.

B. Preliminary ISR Classification

After keying data, the next step in processing was to make a preliminary determination of each case's interview status (ISR)—i.e., whether it was an interview, a noninterview, or out-of-scope for the survey. In general, those cases with "out-of-scope" check-in codes (assigned by clerks when questionnaires were received at the processing center) were classified as out-of-scope (ISR=3) for the preliminary ISR.

Otherwise, cases with data entries were classified as interviews (ISR=1) and those with no data were classified as noninterviews (ISR=2).

C. Computer Edit

After the assignment of the preliminary ISR code, the file was divided into two files: (1) former teachers (leavers) and (2) current teachers (stayers and movers). Then these files were submitted to a computer edit that consisted of a range check, a consistency edit, and a blanking edit. Only records classified as interviews in the preliminary ISR were edited.

The range check deleted entries that were outside the range of acceptable values.

The *consistency edit* identified inconsistent entries within each record and, whenever possible, corrected them; if they could not be corrected, the entries were deleted.

Example:

If the respondent answered "Yes" in Item 9 to indicate that he/she had earned a college degree during the past 12 months but recorded a date in Item 10 (month and year of degree) that was later than June 1995, the "Yes" response in Item 9 was changed to "No" in the consistency edit and the entry in Item 10 was deleted.

The *blanking edit* deleted extraneous entries and assigned the "not answered" (.N) code to items that should have been answered but were not.

D. Final Interview Status Edit

After the range check, consistency edit, and blanking edit were completed, the records were edited to determine whether the case was eligible for inclusion in the survey and, if so, whether sufficient data had been collected for the case to be classified as an interview. An interview status recode (ISR) value was then assigned to each case as a result of the edit:

 A case was classified as out-of-scope (ISR=3) if the respondent had died or moved out of the United States.

- A TFS-2 case (former teacher) was classified as an **interview** (ISR=1) if four of these items were reported:
 - Item 1 Main occupational status
 - Item 4 Full-time/part-time employee status
 - Item 5 Earnings at new job
 - Item 8 Main activity for next year
 - Item 18 Whether respondent plans to return to teaching
 - Item 23a Main reason for leaving teaching profession
- A TFS-3 case (current teacher) was classified as an **interview** (ISR=1) if six of these items were reported:
 - Item 5a Full-time/part-time teaching status
 - Item 7a Main teaching assignment field
 - Item 8a Whether respondent is certified in main teaching assignment field
 - Item 9a Whether respondent is certified in other teaching assignment field
 - Item 10 Grade levels of students taught by respondent
 - Item 11 Type of community where school is located
 - Item 12 Whether respondent has changed schools
 - Item 28 Main activity for next year
 - Item 51b(1) Teaching salary
 - Item 51c Total earned income
- A case was classified as a noninterview (ISR=2) if the conditions for outof-scope cases and interview cases were not met.

Table IV-1.—Number of 1994-95 Teacher Followup Survey teachers in sample, by sector and interview status

Teachers in sample	Interviewed	Not interviewed	Out-of-scope
Public	4,528	463	34
Current teachers	2,798	281	2
Former teachers	1,730	182	32
Private	1,751	330	17
Current teachers	1,175	232	0
Former teachers	576	98	17
BIA	44	6	0

NOTE: Noninterviews and out-of-scope teachers are not included in the TFS analytic or public-use datafiles.

V. Response Rates

A. Survey Response Rates

Table V-1 summarizes the weighted and unweighted response rates for the TFS (shown in percentages).

Table V-1.—Response rates, by sector and teaching status, unweighted and weighted

	Interviews	
Sampled Teachers	Unweighted	Weighted
Public	90.7	92.3
Current teachers	90.9	92.5
Former teachers	90.5	89.2
Private	84.1	87.2
Current teachers	83.5	87.2
Former teachers	85.5	87.6
BIA	88.0	99.5
Current teachers	95.5	99.9
Former teachers	82.1	88.9
Total	88.8	91.6
Current teachers	88.6	91.8
Former teachers	89.1	88.8

Table V-2.—Survey response rates for 1993-94 SASS Teacher List, 1993-94 Schools and Staffing Teacher Survey and 1994-95 Teacher Followup Survey, weighted

					
		Sec	ctor		
	Put	olic	Pri	vate	
Components	Current teachers ¹	Former teachers	Current teachers	Former teachers	
SASS Teacher List					
response rate ²	95	.0	91.0		
SASS Teacher Survey	İ				
response rate ³	88.	.24	80	.2 ⁵	
Teacher Followup Survey					
response rate ⁶	92.5	89.2	87.2	87.6	

¹Includes stayers and movers.

A cumulative overall response rate is the product of the survey response rates shown in Table V-2; (SASS Teacher List response rate) (SASS Teacher Survey response rate) (TFS Teacher response rate). The cumulative overall response rates by sector and teacher status for the 1994–95 TFS are:

Public current teachers: (.95)(.882)(.925)(100)=80.0. Public former teachers: (.95)(.882)(.892)(100)=74.7. Private current teachers: (.91)(.832)(.872)(100)=66.0. Private former teachers: (.91)(.832)(.876)(100)=66.3.

²Percent of schools providing teacher lists for the 1993–94 SASS sample, unweighted.

³Percent of eligible sample teachers responding to the 1993–94 SASS Teacher Survey, weighted.

⁴This rate does not include the 5 percent of the public schools which did not provide teacher lists.

⁵This rate does not include the 9 percent of the private schools that did not provide teacher lists.

⁶Percent of eligible sample teachers responding to the 1994–95 Teacher Followup Survey, weighted.

B. Item Response Rates

Table V-3 is a brief summary of the unweighted item response rates for the 1994-95 TFS questionnaires. A response rate for an item is defined as the number of records with valid responses to that item divided by the number of eligible respondents for the item.

Table V-3.—Summary of Unweighted Item Response Rates

	Former teachers	Current teachers
Range of item response rates	78-100%	52-99%
Percentage of items with a response rate of 90% or more	92.6%	90.4%
Percentage of items with a response rate less than 80%	1.2%	4.1%
Items with a response rate less than 80%	7	9b, 9c, 48i, 51a(1), 51a(2), 51a(3), 51b(3), 51b(4), 57b

The questionnaire wording for these items can be found in appendices B and C of this publication.

VI. Imputation

For questionnaire items that should have been answered but were not, values were imputed by using data from (1) other items on the questionnaire, (2) the 1993-94 SASS Teacher Survey record for the same respondent, and (3) data from the record for a respondent with similar characteristics (commonly known as the nearest neighbor "hotdeck" method for imputing for item nonresponse⁹).

For some incomplete items, the entry from another part of the questionnaire, the SASS Teacher Survey record, or the data record for a similar case was directly imputed to complete the item; for others, the entry was used as part of an adjustment factor with other data on the incomplete record.

The procedures described above were carried out by computer processing. However, for a few items there were cases where entries were clerically imputed. The data record, SASS teacher file record, and in some cases, the questionnaire were reviewed and an entry consistent with the information from those sources was imputed. This procedure was used when (1) there was not suitable record to use as a donor, (2) the computer method produced an entry that was

⁹Kalton, G. and Kasprzyk, D. (1982), "Imputing for Missing Survey Responses," Proceedings of the Section on Survey Research Methods, American Statistical Association, 22–31; Kalton, G., Compensating for Missing Survey Data. Ann Arbor: Survey Research Center, University of Michigan, 1983; Kalton, G. and Kasprzyk, D. (1986), "The Treatment of Missing Survey Data," Survey Methodology, Vol. 12, No.1, pp. 1–16; Little, R. J. A. and Rubin, D. B. (1987), Statistical Analysis with Missing Data, John Wiley and Sons; Madow, W. G., Olkin, I., and Rubin, D. B. (eds.) 1983, Incomplete Data in Sample Surveys, Vols. 1, 2, and 3, New York, Academic Press.

outside the acceptable range for the item, or (3) there were very few cases where an item was unanswered (usually less than 10).

Values were imputed to items with missing data within records classified as interviews (ISR=1). Noninterview adjustment factors were used during the weighting process to compensate for data missing because the sample person was a noninterview (ISR=2).

Entries imputed to TFS records are identified by flags that denote the stage or type of imputation: 1 = ratio adjustment of original entry; 2 = entry was imputed by using other data on the record or from the SASS teacher file; 3 = entry was imputed by using data from the record for a similar sample person (donor); 4 = clerical imputation; 0 = not imputed.

The variable names for these flags are F_(variable name), where variable name is the variable name for the data entry, e.g., F_TFS012 is the imputation flag for variable TFS012 (item 6 of the TFS-2).

VII. Weighting

A. SASS Teacher Weights

The SASS teacher basic weight is the inverse of the probability of selection of the teacher. Teacher basic weights were adjusted to account for schools that refused to provide lists of teachers (school nonresponse adjustment factor), and for teachers who were selected for the survey but did not provide questionnaire data (teacher noninterview factor). In addition, the school sampling adjustment factor and the first-stage ratio adjustment factor were also applied to produce the final weight.

School sampling adjustment factor was applied to certain schools to account for duplicate records, merged schools, or any other circumstance that would affect the school's true probability of selection.

School nonresponse adjustment factor was calculated to compensate for schools that refused to provide lists of their teachers.

First stage ratio adjustment factor adjusted the sample weighted count of all cases (interviewed, noninterview, and out-of-scope) to known frame totals. For public schools, the frame totals such as grade level by urbanicity by state came from the

1991-92 CCD. For private schools on the list frame, the updated private school list frame universe was the source of totals such as grade level by association membership.

B. TFS Teacher Weights

The final TFS sample weight equals:

TFS basic weight x SASS weighting adjustment factor x TFS noninterview adjustment x TFS ratio adjustment

where:

TFS basic weight is the inverse of the probability of selecting a teacher for TFS. This weight is the product of the intermediate teacher weight from SASS (described in previous section) and TFS subsampling adjustment factor. The TFS subsampling adjustment factor is an adjustment that accounts for the subsampling of teachers from SASS sample teachers.

SASS weighting adjustment factor is used to adjust for the fact that preliminary SASS final weights were used in computing the TFS basic weight. The weighting adjustment factor adjusts for any changes that may have occurred between the preliminary and final weighting calculations.

TFS noninterview adjustment is the factor used to adjust for teachers who participated in SASS but did not participate in the 1994-95 TFS.

TFS ratio adjustment is the factor used to adjust the TFS sample totals to known SASS sample totals. This adjustment ensures that the weighted number of TFS teachers (interviews, noninterviews, and out-of-scopes) will equal the weighted number of SASS teachers from 1993–94.

VIII. Variance Estimation

The previous SASS surveys (1987–88 and 1991–92) used the variance procedure known as balanced half sample replication (BHR). A fundamental problem with BHR is that it assumes sampling is done with replacement. Hence, BHR cannot reflect the increase in precision due to sampling a large proportion of a finite population. For most surveys, where the sampling rates are small, the increase in precision will be small and can be safely ignored. However, in SASS the public surveys (school, principal, teacher, library, and librarian) are designed for reliable state estimates. This necessarily implies large sampling rates, which can lead to very large variance overestimates with BHR. Likewise, some of the private surveys (school, principal, and teacher) are designed to produce detailed private association estimates, which also imply large sampling rates, and variance overestimation with BHR.

To overcome this problem, a bootstrap variance estimator was implemented for the 1993-94 SASS. The bootstrap variance reflects the increase in precision due to large sampling rates.

The idea behind bootstrap variance estimation is to use the distribution of the sample weights to generate a bootstrap frame. Bootstrap samples can be selected from the bootstrap frame, replicate weights computed, and variances estimated with standard BHR software. The bootstrap replicate basic weights (inverse of the probability of selection) were subsequently reweighted by processing each set of replicate basic weights through the full-sample weighting procedure.

Further analysis of the bootstrap replicate basic weights revealed that approximately 6 percent of SASS school replicate weights fell outside a 95 percent confidence interval. This is only slightly higher than the expected 5 percent and indicates the bootstrap replicate weights are close to normally distributed.

Public schools. The SASS public school data files contain a set of 48 bootstrap weights, which can be used with any BHR software package. If the package requires specifying a variance methodology, BHR can be specified. At this point, variance computation is similar to the previous SASS and TFS rounds. The difference is in the use of bootstrap methods to produce the replicate weights.

Public school principal replicate weights are the same as the school replicate weights.

Private schools. For private schools, the list frame used the bootstrap methodology as described above. For the area frame, the PSU sampling rates were very small, negating the advantage of using bootstrap.

BHR methodology was employed in the area frame as it has been for all previous SASS. Half-samples are defined by pairing sample PSUs within each sampling stratum, forming variance strata. The final product is a set of 48 replicate weights. After the variance strata were assigned, an orthogonal matrix was used to form the 48 balanced half-sample replicates. Thus, the same methodology can be applied to both the list frame and the area frame replicate weights to compute variances.

Teacher replicates. The teacher replicate weights are generally equal to the school bootstrap replicate weights times the inverse of the conditional probability of selection of the teacher given the school was selected in the SASS school sample. These adjusted bootstrap replicate weights are provided on the file. BHR methodology was employed rather than bootstrap in two instances. First, if a school was selected with certainty and, subsequently, teachers were not sampled with certainty, no bootstrap replicate weights were available, so

¹⁰For more information about bootstrap variance methodology and how it applies to SASS and TFS, see: Efron, B (1982), The Jackknife, the Bootstrap and Other Resampling Plans, SIAM No. 38; Kaufman, S. (1992), "Balanced Half-sampled Replication with Aggregation Units," Proceedings of the Section on Survey Research Methods, American Statistical Association, 1992. Alexandria, VA: American Statistical Association. Kaufman, S. (1993), "A Bootstrap Variance Estimator for the Schools and Staffing Survey," Proceedings of the Section on Survey Research Methods, American Statistical Association, 1993. Alexandria, VA: American Statistical Association. "Properties of the Schools and Staffing Survey's Bootstrap Variance Estimator," Proceedings of the Section on Survey Research Methods, American Statistical Association, 1994. Alexandria, VA: American Statistical Association. Sitter, R.R. (1990), "Comparing Three Bootstrap Methods for Survey Data," Technical Report Series of the Laboratory for Research in Statistics and Probability, Carlton University.

records were sorted by school stratum, order of selection, and control number, and then assigned variance stratum and panel.

The second instance was in the private area frame. These teacher sample records were assigned replicate weights by multiplying the school BHR replicate weights by the teacher's conditional probability of selection given the school was selected in the SASS school sample.

TFS teachers. Since the TFS sample was a proper subsample of the SASS teacher sample, the SASS teacher replicates were used for the TFS sample. The TFS basic weight for each TFS teacher was multiplied by each of the 48 SASS replicate weights divided by the SASS teacher full-sample intermediate weight for that teacher. To calculate 48 replicate weights which should be used for variance calculations, these TFS replicate basic weights were processed through the remainder of the TFS weighting system.

A variance estimate is obtained by first calculating the estimate for each replicate, then summing the squared deviations of the replicate estimates from the full-sample estimate, and finally dividing by the number of replicates:

$$\Sigma (y_k-y)^2/48$$
k

where k = 1, 248,

$$y_k = \text{kth replicate estimate}$$
and y = full sample estimate.

When calculating variance estimates for some small subdomains of interest (e.g., vocational education teachers), sparseness of the data may result in there being no data from some replicates. This can result in either an extremely large variance estimate or failure of the software used to calculate the variance, with possibly a warning message.

WESTAT, Inc. has developed a PC-based replication program, WesVarPC. WesVarPC is available on the World Wide Web. The URL for WESTAT, Inc. is http://www.westat.com. There is a link on the WESTAT home page to the WesVarPC home page. WesVarPC version 2.1, along with the documentation, is available for download at no charge.

IX. Reinterview Program

The purpose of the reinterview for the TFS was to evaluate response variance. Measuring response variance allows us to determine the degree of variability between the original interview responses and the reinterview responses. If the degree of variability is high, questions that need improvement can be determined. A sample of 1,545 cases was selected, expecting 1,000 completed reinterviews. Oversampling occurred to account for potential nonresponse based on the 1991–92 TFS. In actuality we obtained 870 completed reinterviews.

We used two reinterview questionnaires—the TFS-3(R) for mail cases and the TFS-3(R)T for telephone cases. Each questionnaire contained a subset of questions from the original questionnaire.

The TFS reinterview took place from February 21, 1995 through June 16, 1995. An analysis of the reinterview data is in progress.

X. Confidentiality Protection Measures

The 1994-95 TFS data are released in accordance with the provisions of the General Education Provisions Act (GEPA) (20 USC 1221e-1) and the Carl D. Perkins Vocational Education Act. GEPA ensures privacy by ensuring that respondents will never be individually identified.

Under Public Law 100-297, the NCES is responsible for protecting the confidentiality of individual respondents and is releasing data to the public to use for statistical purposes only. Record matching or deductive disclosure by any user is prohibited.

To ensure that the confidentiality provisions contained in PL 100-297 have been fully implemented, procedures for disclosure avoidance were used in preparing the data tape in this release. Every effort has been made to provide the maximum research information consistent with reasonable confidentiality protections.

To prevent disclosure of the identities of teachers on the public-use data tapes, state identifiers (for the public school teachers) and state, regional, and detailed affiliation and association codes (for the private school teachers) have been removed. In addition, continuous variables on the questionnaire that would permit disclosure of a teacher's identity (age and salary) have been coded into categories. The new categories for recoded variables are defined for the appropriate source codes on the attached tape record layouts. A few items have been deleted from the files altogether because of disclosure problems. These will be missing on the record layouts.

Difference between public and restricted use file. To protect the confidentiality of responding teachers, certain categories were collapsed on the public-use file so that teachers cannot be identified. These included base academic year salary, teacher's age, total enrollment, percent minority enrollment, and the community type (rural, small town, urban, and central city) of the school. State identifiers and school affiliation were deleted from the public-use file.

XI. Changes to TFS Content from 1991-92 to 1994-95

Some changes to wording and the order of specific items has occurred. Also, a new section was added to the Questionnaire for Current Teachers (TFS-3) to collect data on teaching methods. These new questions are Items 31–50.

XII. Caution Concerning the Measurement of Change Using 1991-92 and 1994-95 TFS

Changes in question wording. Caution must used in the interpretation of change estimates between 1991-92 and 1994-95 TFS since specific questions are not always worded the same in both surveys.

XIII. User Notes and Comments

We are interested in your reaction to the information presented here about the Teacher Followup Survey (TFS) data collection system as well as the microdata files we release. We welcome your recommendations for improving our survey work and data products. If you have suggestions or comments or want more information about this report, please contact:

Teacher Followup Survey National Center for Education Statistics 555 New Jersey Avenue, NW Washington, DC 20208-5651

We are also interested in the research you do using the TFS data sets. We would be pleased to receive copies of reports, working papers, and published articles you write, which use data from the TFS. Send them to the address above.

THANK YOU FOR TAKING THE TIME TO RESPOND!

Most of the items on this questionnaire are arranged so that the answer categories or spaces for written answers are under the questions. Please answer the questions by marking the appropriate answer category with an X, or recording your answer in the space provided. We suggest that you use a pencil, rather than a pen or marker.

Notice that at the end of some answer categories and answer spaces, there are instructions to skip to later questions or to continue with the next question on the questionnaire.

If you are unsure about how to answer a question, please give the best answer you can and make a comment in the "Notes" space. Please include the item number.

If you have any questions, call the Bureau of the Census, toll free, at 1-800-221-1204.

Return your completed questionnaire to the Bureau of the Census in the enclosed preaddressed envelope. Please return it within two weeks.

Please keep count of the time you spend completing this questionnaire. At the end of the survey, you are asked to record the amount of time spent.

Are you currently	teaching -	full-time,	part-time,	or as a	long-term :	substitute -	– in
grades K through	12?	1	•		_		

003

1 Yes PLEASE CONTINUE with this survey.

RETURN THIS FORM to the Bureau of the Census in the enclosed envelope. You will be sent another form for teachers who are still teaching.

SECTION I - MAIN ACTIVITY

EDUCATION FIELDS

(Use codes to answer items 1a, 1b, 2, 3a, and 3b)

- **01** Teaching in an elementary or secondary school
- **04** Attending a college or university
- Working in an elementary or secondary school with an assignment OTHER THAN teaching
- 05 Caring for family members 06 Retired
- Working in an occupation outside of elementary or secondary education
- 07 Other
- 1a. Is your time EQUALLY DIVIDED between two of the above listed activities?

090	T 1 ☐ Yes
	GO to item 2.

What are the codes from the list above?

092 Code

and

GO to item 4.

2. What code from the list above best describes the activity you spend most of your time on during the work week; that is, what is your main activity?

J94 Main activity Code

Do you spend time on any other activity from the list above?

□Yes 295 r2□No GO to item 4.

What code from the list above best describes this other activity?

Other activity Code

SECTION IV - TEACHING METHODS

This section asks about the teaching strategies, instructional practices, and organizational techniques you use in teaching. The information you provide is intended to describe students' educational experiences and inform future national surveys of school processes.

Think of the class for which you had primary responsibility last semester or grading period when answering the following questions. If you were responsible for a single group of students all day (such as an elementary teacher might have been), think of them as the designated class. If you were responsible for multiple classes or groups of students (such as a content area or special education teacher might have been), select your first instructional class or group of the day (not homeroom). Think of this as the "DESIGNATED" class.

FORM TFS-3 -1-3 95

SI	ECTION V - INCENTIVES AND COMPENSATION
51.	The following questions refer to your before-tax earnings from teaching and other employment from the summer of 1994 through the end of the 1994-95 school year.
	Record earnings in whole dollars.
а	a. DURING THE SUMMER OF 1994, did you have any earnings from -
	(1) Teaching summer school in this or any other school?
362	¹ ☐ Yes - How much? > ³⁶³ \$00
	(2) Working in a nonteaching job in this or any other school?
384	¹☐ Yes How much? > 355 \$
	(3) Working in any NONSCHOOL job?
366	1 ☐ Yes - How much? → 357 \$
	DURING THE CURRENT SCHOOL YEAR -
	(1) What is your academic year base salary for teaching in this school?
368	\$00 per year
	(2) Do you, or will you, earn any additional compensation from your school for extracurricular or additional activities such as coaching, student activity sponsorship, or evening classes?
369	¹□ Yes - How much? → 370 \$
	(3) Do you, or will you, earn additional compensation from working in any job outside this school system?
371	1 ☐ Yes - How much? → 372 \$
	GO to item 51b(4).
	Which of these best describes this job outside the school system? Mark (X) only one box.
373	1☐ Teaching or tutoring 2☐ Nonteaching, but education related 3☐ Not related to education
	(4) Have you EARNED income from any other sources this year, e.g., a bonus, state supplement, etc.?
374	1 ☐ Yes - How much? → 575 \$
	What will be your total EARNED income from all sources from the summer of 1994 through the end of this school year? Your answer should equal the sum of your answers to questions 51a(1)-b(4).
376	
D I C	\$

56

SE	CTION VI - BACKGROUND INFORMATION
52.	Do you receive any income-in-kind in addition to or in lieu of your school salary?
	Mark (X) all that apply.
377	¹☐ Housing or housing expenses
373	2☐ Meals
379	3☐ Tuition for your children
330	4☐ Child care
381	5☐ College tuition for yourself
382	6☐ Car/transportation expenses
383	□ None of the above
53.	Which category represents the total combined income (include your own income) of ALL FAMILY MEMBERS age 14 and older in your household during 1994? Include money from jobs, net business or farm income, pensions, dividends, interest, rent, Social Security payments, and any other income received by family members in your household.
	Mark (X) only one box.
384	1☐ Less than \$10,000 5☐ \$25,000 - \$29,999 9☐ \$50,000 - \$59,999 2☐ \$10,000 - \$14,999 6☐ \$30,000 - \$34,999 10☐ \$60,000 - \$74,999
	3□\$15,000 - \$19,999 7□\$35,000 - \$39,999 11□\$75,000 - \$99,999
	4□\$20,000 - \$24,999 8□\$40,000 - \$49,999 12□\$100,000 or more
54.	What is your current marital status?
385	ı□ Married
	2□ Widowed, divorced, or separated 3□ Never married
55.	How many children do you have who are dependent on you (and your spouse) for more than half of their financial support?
	₀□ None—→ GO to item 57a.
386	OR .
	Children supported
	<u> </u>
56.	What was the age of your youngest child on his/her last birthday? (If child is less than one year, please enter "0.")
387	Age of youngest child
57a.	Do you have persons other than your spouse or children who are dependent on you for more than half of their financial support?
388	T Yes Volume 1 No
	GO to item 58.
b.	. How many persons other than your spouse or children are dependent on you for more than half of their financial support?
389	Number of a constant
	Number of persons supported

3 X OFFICE USE ONLY

INSTRUCTIONS

Most of the items on this questionnaire are arranged so that the answer categories or spaces for written answers are under the questions. Please answer the questions by marking the appropriate answer category with an X, or recording your answer in the space provided. We suggest that you use a pencil, rather than a pen or marker.

Notice that at the end of some answer categories and answer spaces, there are instructions to go to later questions or to continue with the next question on the questionnaire.

If you are unsure about how to answer a question, please give the best answer you can and make a comment in the "Notes" space. Please include the item number.

If you have any questions, call the Bureau of the Census, toll free, at 1-800-221-1204.

Return your completed questionnaire to the Bureau of the Census in the enclosed preaddressed envelope. Please return it within two weeks.

Please keep count of the time you spend completing this questionnaire. At the end of the survey, you are asked to record the amount of time spent.

Are you currently teaching - full-time, part-time, or as a long-term substitute - in grades K through 12?

003

1 ☐ Yes STOP RETURN THIS FORM to the Bureau of the Census in the enclosed envelope. You will be sent another form for teachers who are still teaching.

2 No PLEASE CONTINUE with this survey.

SECTION I - EMPLOYMENT STATUS

1. What is your MAIN OCCUPATIONAL status?

Mark (X) only one box.

004 1☐ Working in an elementary or secondary school with an assignment OTHER THAN teaching 2 Working in an occupation outside of elementary or secondary education -3 Student at a college or university 4☐ Caring for family members s□ Retired 6☐ Disabled 7☐Other - Specify Z

GO to item 8.

2. What is your MAIN school assignment?

Mark (X) only one box.

005

1 Administrator (e.g., principal, assistant principal, director, head)

2 Nonteaching specialist (e.g., counselor, librarian)

3 Resource person for other teachers (e.g., department head, resource teacher, curriculum coordinator, mentor teacher)

⁴ □ Support staff (e.g., secretary, aide)

5 ☐ Coach

6 Other - Specify →

SECTION III - YOUR OPINIONS - CONTINUED

POSSIBLE STEPS SCHOOLS MIGHT TAKE TO ENCOURAGE TEACHERS TO REMAIN IN TEACHING

(Use codes to answer items 24a, b, and c.)

- 01 Providing higher salaries and/or better fringe benefits
- 02 Improving opportunities for professional advancement
- 03 Dealing more effectively with student discipline and making schools safer
- 04 Giving teachers more authority in the school and in their own classrooms
- 05 Increasing standards for students' academic performance
- '06 Providing better resources and materials for classroom use
- 07 Decreasing class size
- 08 Giving special recognition and/or special assignments to excellent or outstanding teachers
- 09 Reducing the paperwork burden on teachers
- 10 Providing more support for new teachers (e.g., mentor teacher programs)
- 11 Increasing parent involvement in the schools
- 12 Reducing teacher workload
- 13 Providing merit pay or other pay incentives to teachers
- 14 Improving opportunities for professional development
- 15 Providing tuition reimbursement for coursework required for certification or career advancement
- 16 Revising health insurance program to include stress reduction seminars, counseling, and physical fitness options

What would be the most effective step that schools might take to encourage teachers to remain in teaching?
Enter code from above.
Most effective step
What would be the second most effective step?
Enter code from above.
Second step
What would be the third most effective step?
Enter code from above.
Third step Code

Appendix D

Industry and Occupation Codes

Appendix D. 1990 Census of Population - Industry and Occupation Codes

These codes were used to classify the entries in item 3 (description of new job) of the Questionnaire for Former Teachers (TFS-2).

INDUSTRY CLASSIFICATIONS

AGRICULTURE, FORESTRY, AND FISHERIES

- 010 Agricultural production crops
- 011 Agricultural production livestock
- 012 Veterinary services
- 020 Landscape and horticultural services
- 030 Agricultural services not elsewhere classified
- 031 Forestry
- 032 Fishing, hunting, and trapping

MINING

- 040 Metal mining
- 041 Coal mining
- 042 Oil and gas extraction
- 050 Nonmetallic mining and quarrying, except fuel

CONSTRUCTION

060 Construction

MANUFACTURING - NONDURABLE GOODS

Food and Kindred Products

- 100 Meat products
- 101 Dairy products
- 102 Canned, frozen, and preserved fruits and vegetables
- 110 Grain mill products
- 111 Bakery products
- 112 Sugar and confectionery products
- 120 Beverage industries
- 121 Miscellaneous food preparations and kindred products
- 122 Unspecified food industries

Tobacco Products

130 Tobacco manufactures

Textile Mill Products

- 132 Knitting mills
- 140 Dyeing and finishing textiles, except wool and knit goods
- 141 Carpets and rugs
- 142 Yarn, thread, and fabric mills
- 150 Miscellaneous textile mill products

Apparel and Other Finished Textile Products

- 151 Apparel and accessories, except knit
- 152 Miscellaneous fabricated textile products

Paper and Allied Products

- 160 Pulp, paper, and paperboard mills
- 161 Miscellaneous paper and pulp products
- 162 Paperboard containers and boxes

Printing, Publishing, and Allied Industries

- 171 Newspaper publishing and printing
- 172 Printing, publishing, and allied industries, except newspapers

Chemicals and Allied Products

- 180 Plastics, synthetics, and resins
- 181 Drugs
- 182 Soaps and cosmetics
- 190 Paints, varnishes, and related products
- 191 Agricultural chemicals
- 192 Industrial and miscellaneous chemicals

Petroleum and Coal Products

- 200 Petroleum refining
- 201 Miscellaneous petroleum and coal products

Rubber and Miscellaneous Plastic Products

- 210 Tires and inner tubes
- 211 Other rubber products, plastic footwear and belting
- 212 Miscellaneous plastic products

Leather and Leather Products

- 220 Leather tanning and finishing
- 221 Footwear, except rubber and plastic
- 222 Leather products, except footwear

MANUFACTURING - DURABLE GOODS

Lumber and Wood Products, Except Furniture

- 230 Logging
- 231 Sawmills, planing mills, and millwork
- 232 Wood buildings and mobile homes
- 241 Miscellaneous wood products

Furniture

242 Furniture and fixtures

Stone, Clay, Glass, and Concrete Products

- 250 Glass and glass products
- 251 Cement, concrete, gypsum, and plaster products
- 252 Structural clay products
- 261 Pottery and related products
- 262 Miscellaneous nonmetallic mineral and stone products

Metal Industries

- 270 Blast furnaces, steelworks, rolling and finishing mills
- 271 Iron and steel foundries
- 272 Primary aluminum industries
- 280 Other primary metal industries
- 281 Cutlery, hand tools, and general hardware
- 282 Fabricated structural metal products
- 290 Screw machine products
- 291 Metal forgings and stampings
- 292 Ordnance
- 300 Miscellaneous fabricated metal products
- 301 Unspecified metal industries

Machinery and Computing Equipment

- 310 Engines and turbines
- 311 Farm machinery and equipment
- 312 Construction and material-handling machines
- 320 Metalworking machinery
- 321 Office and accounting machines
- 322 Computers and related equipment
- 331 Machinery not elsewhere classified, except electrical
- 332 Unspecified machinery

Electrical Machinery, Equipment, and Supplies

- 340 Household appliances
- 341 Radio, television, and communication equipment
- 342 Electrical machinery, equipment, and supplies not elsewhere classified
- 350 Unspecified electrical machinery, equipment, and supplies

Transportation Equipment

- 351 Motor vehicles and motor vehicle equipment
- 352 Aircraft and parts
- 360 Ship and boat building and repairing
- 361 Railroad locomotives and equipment
- 362 Guided missiles, space vehicles, and parts
- 370 Cycles and miscellaneous transportation equipment

Professional and Photographic Equipment, and Watches

- 371 Scientific and controlling instruments
- 372 Medical, dental, and optical instruments and supplies
- 380 Photographic equipment and supplies
- 381 Watches, clocks, and clockwork-operated devices

Toys, Amusement, and Sporting Goods

390 Toys, amusement, and sporting goods

MISCELLANEOUS MANUFACTURING INDUSTRIES

- 391 Miscellaneous manufacturing industries
- 392 Unspecified manufacturing industries

TRANSPORTATION, COMMUNICATIONS, AND OTHER PUBLIC UTILITIES

Transportation

- 400 Railroads
- 401 Bus service and urban transit
- 402 Taxicab service
- 410 Trucking service
- 411 Warehousing and storage
- 412 U.S. Postal Service
- 420 Water transportation
- 421 Air transportation
- 422 Pipe lines, except natural gas
- 432 Services incidental to transportation

Communications

- 440 Radio and television broadcasting and cable
- 441 Telephone communications
- 442 Telegraph and miscellaneous communication services

Utilities and Sanitary Services

- 450 Electric light and power
- 451 Gas and steam supply systems
- 452 Electric and gas, and other combinations
- 470 Water supply and irrigation
- 471 Sanitary services
- 472 Unspecified utilities

WHOLESALE TRADE

Durable Goods

- 500 Motor vehicles and equipment
- 501 Furniture and home furnishings
- 502 Lumber and construction materials
- 510 Professional and commercial equipment and supplies
- 511 Metals and minerals, except petroleum
- 512 Electrical goods
- 521 Hardware, plumbing and heating supplies
- 530 Machinery, equipment, and supplies
- 531 Scrap and waste materials
- 532 Miscellaneous wholesale trade durable goods

Nondurable Goods

- 540 Paper and paper products
- 541 Drugs, chemicals, and allied products
- 542 Apparel, fabrics, and notions
- 550 Groceries and related products
- 551 Farm-product raw materials
- 552 Petroleum products
- 560 Alcoholic beverages
- 561 Farm supplies
- 562 Miscellaneous wholesale trade nondurable goods
- 571 Unspecified wholesale trade

RETAIL TRADE

- 580 Lumber and building material retailing
- 581 Hardware stores
- 582 Retail nurseries and garden stores
- 590 Mobile home dealers
- 591 Department stores
- 592 Variety stores
- 600 Miscellaneous general merchandise stores
- 601 Grocery stores
- 602 Dairy products stores
- 610 Retail bakeries
- 611 Food stores not elsewhere classified
- 612 Motor vehicle dealers
- 620 Auto and home supply stores

RETAIL TRADE, continued

- 621 Gasoline service stations
- 622 Miscellaneous vehicle dealers
- 623 Apparel and accessory stores, except shoes
- 630 Shoe stores
- 631 Furniture and home furnishings stores
- 632 Household appliance stores
- 633 Radio, television, and computer stores
- 640 Music stores
- 641 Eating and drinking places
- 642 Drug stores
- 650 Liquor stores
- 651 Sporting goods, bicycles, and hobby stores
- 652 Book and stationery stores
- 660 Jewelry stores
- 661 Gift, novelty, and souvenir shops
- 662 Sewing, needlework, and piece goods stores
- 663 Catalog and mail order houses
- 670 Vending machine operators
- 671 Direct-selling establishments
- 672 Fuel dealers
- 681 Retail florists
- 682 Miscellaneous retail stores
- 691 Unspecified retail trade

FINANCE, INSURANCE, AND REAL ESTATE

- 700 Banking
- 701 Savings institutions, including credit unions
- 702 Credit agencies not elsewhere classified
- 710 Security, commodity brokerage, and investment companies
- 711 Insurance
- 712 Real estate, including real estate-insurance offices

BUSINESS AND REPAIR SERVICES

- 721 Advertising
- 722 Services to dwellings and other buildings
- 731 Personnel supply services
- 732 Computer and data processing services
- 740 Detective and protective services
- 741 Business services not elsewhere classified
- 742 Automotive rental and leasing, without drivers
- 750 Automotive parking and carwashes
- 751 Automotive repair and related services
- 752 Electrical repair shops
- 760 Miscellaneous repair services

PERSONAL SERVICES

- 761 Private households
- 762 Hotels and motels
- 770 Lodging places, except hotels and motels
- 771 Laundry, cleaning, and garment services
- 772 Beauty shops
- 780 Barber shops
- 781 Funeral service and crematories
- 782 Shoe repair shops
- 790 Dressmaking shops
- 791 Miscellaneous personal services

ENTERTAINMENT AND RECREATION SERVICES

- 800 Theaters and motion pictures
- 801 Video tape rental
- 802 Bowling centers
- 810 Miscellaneous entertainment and recreation services

PROFESSIONAL AND RELATED SERVICES

- 812 Offices and clinics of physicians
- 820 Offices and clinics of dentists
- 821 Offices and clinics of chiropractors
- 822 Offices and clinics of optometrists
- 830 Offices and clinics of health practitioners not elsewhere classified
- 831 Hospitals
- 832 Nursing and personal care facilities
- 840 Health services not elsewhere classified
- 841 Legal services
- 842 Elementary and secondary schools
- 850 Colleges and universities
- 851 Vocational schools
- 852 Libraries
- 860 Educational services not elsewhere classified
- 861 Job training and vocational rehabilitation services
- 862 Child day-care services
- 863 Family child-care homes
- 870 Residential care facilities, without nursing
- 871 Social services not elsewhere classified
- 872 Museums, art galleries, and zoos
- 873 Labor unions
- 880 Religious organizations
- 881 Membership organizations not elsewhere classified
- 882 Engineering, architectural, and surveying services
- 890 Accounting, auditing, and bookkeeping services
- 891 Research, development, and testing services
- 892 Management and public relations services
- 893 Miscellaneous professional and related services

PUBLIC ADMINISTRATION

- 900 Executive and legislative offices
- 901 General government not elsewhere classified
- 910 Justice, public order, and safety
- 921 Public finance, taxation, and monetary policy
- 922 Administration of human resources programs
- 930 Administration of environmental quality and housing programs
- 931 Administration of economic programs
- 932 National security and international affairs

ARMED FORCES

- 940 Army
- 941 Air Force
- 942 Navy
- 950 Marines
- 951 Coast Guard
- 952 Armed Forces branch not specified
- 960 Military Reserves or National Guard

OCCUPATION CLASSIFICATIONS

EXECUTIVE, ADMINISTRATIVE, AND MANAGERIAL OCCUPATIONS

- 003 Legislators
- 004 Chief executives and general administrators public administration
- 005 Administrators and officials public administration
- 006 Administrators protective services
- 007 Financial managers
- 008 Personnel and labor relations managers
- 009 Purchasing managers
- 013 Managers marketing, advertising, and public relations
- 014 Administrators education and related fields
- 015 Managers medicine and health
- 016 Postmasters and mail superintendents
- 017 Managers food-serving and lodging establishments
- 018 Managers properties and real estate
- 019 Funeral directors
- 021 Managers service organizations not elsewhere classified
- 022 Managers and administrators not elsewhere classified

Management-related Occupations

- 023 Accountants and auditors
- 024 Underwriters
- 025 Other financial officers
- 026 Management analysts
- 027 Personnel, training, and labor relations specialists
- 028 Purchasing agents and buyers farm products
- 029 Buyers wholesale and retail trade, except farm products
- 033 Purchasing agents and buyers not elsewhere classified
- 034 Business and promotion agents
- 035 Construction inspectors
- 036 Inspectors and compliance officers, except construction
- 037 Management-related occupations not elsewhere classified

PROFESSIONAL SPECIALTY OCCUPATIONS

Architects, Engineers, and Surveyors

043 Architects, except naval architects

Engineers

- 044 Aerospace engineers
- 045 Metallurgical and materials engineers
- 046 Mining engineers
- 047 Petroleum engineers
- 048 Chemical engineers
- 049 Nuclear engineers
- 053 Civil engineers
- 054 Agricultural engineers

Architects, Engineers, and Surveyors, continued

- 055 Electrical and electronic engineers
- 056 Industrial engineers
- 057 Mechanical engineers
- 058 Marine engineers and naval architects
- 059 Engineers not elsewhere classified
- 063 Surveyors and mapping scientists

Mathematical and Computer Scientists

- 064 Computer systems analysts and scientists
- 065 Operations and systems researchers and analysts
- 066 Actuaries
- 067 Statisticians
- 068 Mathematical scientists not elsewhere classified

Natural Scientists

- 069 Physicists and astronomers
- 073 Chemists, except biochemists
- 074 Atmospheric and space scientists
- 075 Geologists and geodesists
- 076 Physical scientists not elsewhere classified
- 077 Agricultural and food scientists
- 078 Biological and life scientists
- 079 Forestry and conservation scientists
- 083 Medical scientists

Health Diagnosing Occupations

- 084 Physicians
- 085 Dentists
- 086 Veterinarians
- 087 Optometrists
- 088 Podiatrists
- 089 Health diagnosing practitioners not elsewhere classified

Health Assessment and Treating Occupations

- 095 Registered nurses
- 096 Pharmacists
- 097 Dietitians

Therapists

- 098 Respiratory therapists
- 099 Occupational therapists
- 103 Physical therapists
- 104 Speech therapists
- 105 Therapists not elsewhere classified
- 106 Physicians' assistants

Teachers - Postsecondary

- 113 Earth, environmental, and marine science teachers
- 114 Biological science teachers
- 115 Chemistry teachers
- 116 Physics teachers
- 117 Natural science teachers not elsewhere classified
- 118 Psychology teachers
- 119 Economics teachers
- 123 History teachers
- 124 Political science teachers
- 125 Sociology teachers
- 126 Social science teachers not elsewhere classified
- 127 Engineering teachers
- 128 Mathematical science teachers
- 129 Computer science teachers
- 133 Medical science teachers
- 134 Health specialties teachers
- 135 Business, commerce, and marketing teachers
- 136 Agriculture and forestry teachers
- 137 Art, drama, and music teachers
- 138 Physical education teachers
- 139 Education teachers
- 143 English teachers
- 144 Foreign language teachers
- 145 Law teachers
- 146 Social work teachers
- 147 Theology teachers
- 148 Trade and industrial teachers
- 149 Home economics teachers
- 153 Postsecondary teachers not elsewhere classified
- 154 Postsecondary teachers subject not specified

Teachers, Except Postsecondary

- 155 Teachers prekindergarten and kindergarten, except special education
- 156 Teachers elementary school, except prekindergarten, kindergarten, and special education
- 157 Teachers secondary school, except special education
- 158 Teachers special education
- 159 Teachers not elsewhere classified

Counselors - Educational and Vocational

163 Counselors - educational and vocational

Librarians, Archivists, and Curators

- 164 Librarians
- 165 Archivists and curators

Social Scientists and Urban Planners

- 166 Economists
- 167 Psychologists
- 168 Sociologists
- 169 Social scientists not elsewhere classified
- 173 Urban planners

Social, Recreation, and Religious Workers

- 174 Social workers
- 175 Recreation workers
- 176 Clergy
- 177 Religious workers not elsewhere classified

Lawyers and Judges

- 178 Lawyers
- 179 Judges

Writers, Artists, Entertainers, and Athletes

- 183 Authors
- 184 Technical writers
- 185 Designers
- 186 Musicians and composers
- 187 Actors and directors
- 188 Painters, sculptors, craft artists, and artist printmakers

Writers, Artists, Entertainers, and Athletes, continued

- 189 Photographers
- 193 Dancers
- 194 Artists, performers, and related workers not elsewhere classified
- 195 Editors and reporters
- 197 Public relations specialists
- 198 Announcers
- 199 Athletes

TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS

Health Technologists and Technicians

- 203 Clinical laboratory technologists and technicians
- 204 Dental hygienists
- 205 Health record technologists and technicians
- 206 Radiologic technicians
- 207 Licensed practical nurses
- 208 Health technologists and technicians not elsewhere classified

Technologists and Technicians, Except Health

Engineering and related technologists and technicians

- 213 Electrical and electronic technicians
- 214 Industrial engineering technicians
- 215 Mechanical engineering technicians
- 216 Engineering technicians not elsewhere classified
- 217 Drafting occupations
- 218 Surveying and mapping technicians

Science technicians

- 223 Biological technicians
- 224 Chemical technicians
- 225 Science technicians not elsewhere classified

Technicians, except health, engineering, and science

- 226 Airplane pilots and navigators
- 227 Air traffic controllers
- 228 Broadcast equipment operators
- 229 Computer programmers
- 233 Tool programmers, numerical control
- 234 Legal assistants
- 235 Technicians not elsewhere classified

Sales Occupations

243 Supervisors and proprietors - sales occupations

Sales representatives - finance and business services

- 253 Insurance sales occupations
- 254 Real estate sales occupations
- 255 Securities and financial services sales occupations
- 256 Advertising and related sales occupations
- 257 Sales occupations other business services

Sales representatives - commodities, except retail

- 258 Sales engineers
- 259 Sales representatives mining, manufacturing, and wholesale

Sales workers - retail and personal services

- 263 Sales workers motor vehicles and boats
- 264 Sales workers apparel
- 265 Sales workers shoes
- 266 Sales workers furniture and home furnishings
- 267 Sales workers radio, television, hi-fi, and appliances
- 268 Sales workers hardware and building supplies
- 269 Sales workers parts
- 274 Sales workers other commodities
- 275 Sales counter clerks
- 276 Cashiers
- 277 Street and door-to-door sales workers
- 278 News vendors

Sales-related occupations

- 283 Demonstrators, promoters and models sales
- 284 Auctioneers
- 285 Sales support occupations not elsewhere classified

Administrative Support Occupations, Including Clerical

Supervisors - administrative support occupations

- 303 Supervisors general office
- 304 Supervisors computer equipment operators
- 305 Supervisors, financial records processing
- 306 Chief communications operators
- 307 Supervisors distribution, scheduling, and adjusting clerks

Computer equipment operators

- 308 Computer operators
- 309 Peripheral equipment operators

Secretaries, stenographers, and typists

- 313 Secretaries
- 314 Stenographers
- 315 Typists

Information clerks

- 316 Interviewers
- 317 Hotel clerks
- 318 Transportation ticket and reservation agents
- 319 Receptionists
- 323 Information clerks not elsewhere classified

Records-processing occupations, except financial

- 325 Classified-ad clerks
- 326 Correspondence clerks
- 327 Order clerks
- 328 Personnel clerks, except payroll and timekeeping
- 329 Library clerks
- 335 File clerks
- 336 Records clerks

Financial records processing occupations

- 337 Bookkeepers, accounting, and auditing clerks
- 338 Payroll and timekeeping clerks
- 339 Billing clerks
- 343 Cost and rate clerks
- 344 Billing, posting, and calculating machine operators

Duplicating, mail and other office machine operators

- 345 Duplicating machine operators
- 346 Mail-preparing and paper-handling machine operators
- 347 Office machine operators not elsewhere classified

Communications equipment operators

- 348 Telephone operators
- 353 Communications equipment operators not elsewhere classified

Mail and message distributing occupations

- 354 Postal clerks, except mail carriers
- 355 Mail carriers postal service
- 356 Mail clerks, except postal service
- 357 Messengers

Other material-recording, scheduling, and distributing clerks

- 359 Dispatchers
- 363 Production coordinators
- 364 Traffic, shipping, and receiving clerks
- 365 Stock and inventory clerks
- 366 Meter readers
- 368 Weighers, measurers, checkers, and samplers
- 373 Expediters
- 374 Material-recording, scheduling, and distributing clerks not elsewhere classified

Adjusters and investigators

- 375 Insurance adjusters, examiners, and investigators
- 376 Investigators and adjusters, except insurance
- 377 Eligibility clerks social welfare
- 378 Bill and account collectors

Miscellaneous administrative support occupations

- 379 General office clerks
- 383 Bank tellers
- 384 Proofreaders
- 385 Data-entry keyers
- 386 Statistical clerks
- 387 Teachers' aides
- 389 Administrative support occupations not elsewhere classified

SERVICE OCCUPATIONS

Private Household Occupations

- 403 Launderers and ironers
- 404 Cooks private household
- 405 Housekeepers and butlers
- 406 Child-care workers private household
- 407 Private household cleaners and servants

Protective Service Occupations

Supervisors - protective service occupations

- 413 Supervisors firefighting and fire prevention occupations
- 414 Supervisors police and detectives
- 415 Supervisors guards

Appendix D-Industry and Occupation Codes

Firefighting and fire prevention occupations

- 416 Fire inspection and fire prevention occupations
- 417 Firefighting occupations

Police and detectives

- 418 Police and detectives public service
- 423 Sheriffs, bailiffs, and other law enforcement officers
- 424 Correctional institution officers

Guards

- 425 Crossing guards
- 426 Guards and police, except public service
- 427 Protective service occupations not elsewhere classified

Service Occupations, Except Protective and Private Household

Food preparation and service occupations

- 433 Supervisors food preparation and service occupations
- 434 Bartenders
- 435 Waiters and waitresses
- 436 Cooks
- 438 Food counter, fountain and related occupations
- 439 Kitchen workers food preparation
- 443 Waiters'/waitresses' assistants
- 444 Miscellaneous food preparation occupations

Health service occupations

- 445 Dental assistants
- 446 Health aides, except nursing
- 447 Nursing aides, orderlies, and attendants

Cleaning and building-service occupations, except private household

- 448 Supervisors cleaning and building-service workers
- 449 Maids and housemen
- 453 Janitors and cleaners
- 454 Elevator operators
- 455 Pest control occupations

Personal service occupations

- 456 Supervisors personal service occupations
- 457 Barbers
- 458 Hairdressers and cosmetologists
- 459 Attendants amusement and recreation facilities
- 461 Guides
- 462 Ushers
- 463 Public transportation attendants
- 464 Baggage porters and bellhops
- 465 Welfare service aides
- 466 Family child-care providers
- 467 Early childhood teacher's assistants
- 468 Child-care workers not elsewhere classified
- 469 Personal service occupations not elsewhere classified

FARMING, FORESTRY, AND FISHING OCCUPATIONS

Farm Operators and Managers

- 473 Farmers, except horticultural
- 474 Horticultural specialty farmers
- 475 Managers farms, except horticultural
- 476 Managers horticultural specialty farms

Other Agricultural and Related Occupations

Farm occupations, except managers and operators

- 477 Supervisors farm workers
- 479 Farm workers
- 483 Marine-life cultivation workers
- 484 Nursery workers

Related agricultural occupations

- 485 Supervisors related agricultural occupations
- 486 Groundskeepers and gardeners, except farm
- 487 Animal caretakers, except farm
- 488 Graders and sorters agricultural products
- 489 Inspectors agricultural products

Forestry and logging occupations

- 494 Supervisors forestry and logging workers
- 495 Forestry workers, except logging
- 496 Timber cutting and logging occupations

Fishers, hunters, and trappers

- 497 Captains and other officers fishing vessels
- 498 Fishers
- 499 Hunters and trappers

PRECISION PRODUCTION, CRAFT, AND REPAIR OCCUPATIONS

Mechanics and Repairers

503 Supervisors - mechanics and repairers

Mechanics and repairers, except supervisors

Vehicle and mobile equipment mechanics and repairers

- 505 Automobile mechanics
- 506 Automobile mechanic apprentices
- 507 Bus, truck, and stationary engine mechanics
- 508 Aircraft engine mechanics
- 509 Small engine repairers
- 514 Automobile body and related repairers
- 515 Aircraft mechanics, except engine
- 516 Heavy equipment mechanics
- 517 Farm equipment mechanics

Vehicle and mobile equipment mechanics and repairers, continued

- 518 Industrial machinery repairers
- 519 Machinery maintenance occupations

Electrical and electronic equipment repairers

- 523 Electronic repairers- communications and industrial equipment
- 525 Data processing equipment repairers
- 526 Household appliance and power tool repairers
- 527 Telephone line installers and repairers
- 529 Telephone installers and repairers
- 533 Miscellaneous electrical and electronic equipment repairers
- 534 Heating, air conditioning, and refrigeration mechanics

Miscellaneous mechanics and repairers

- 535 Camera, watch, and musical instrument repairers
- 536 Locksmiths and safe repairers
- 538 Office machine repairers
- 539 Mechanical controls and valve repairers
- 543 Elevator installers and repairers
- 544 Millwrights
- 547 Specified mechanics and repairers not elsewhere classified
- 549 Unspecified mechanics and repairers

Construction Trades

Supervisors - construction occupations

- 553 Supervisors brickmasons, stonemasons, and tile setters
- 554 Supervisors carpenters and related workers
- 555 Supervisors electricians and power-transmission installers (6014)
- 556 Supervisors painters, paperhangers, and plasterers
- 557 Supervisors plumbers, pipefitters, and steamfitters
- 558 Construction supervisors not elsewhere classified

Construction trades, except supervisors

- 563 Brickmasons and stonemasons
- 564 Brickmason and stonemason apprentices
- 565 Tile setters hard and soft
- 566 Carpet installers
- 567 Carpenters
- 569 Carpenter apprentices
- 573 Drywall installers
- 575 Electricians
- 576 Electrician apprentices
- 577 Electrical power installers and repairers
- 579 Painters construction and maintenance
- 583 Paperhangers
- 584 Plasterers
- 585 Plumbers, pipefitters, and steamfitters
- 587 Plumber, pipefitter, and steamfitter apprentices
- 588 Concrete and terrazzo finishers
- 589 Glaziers
- 593 Insulation workers

Construction trades, except supervisors, continued

- 594 Paving, surfacing, and tamping equipment operators
- 595 Roofers
- 596 Sheetmetal duct installers
- 597 Structural metal workers
- 598 Drillers earth
- 599 Construction trades not elsewhere classified

Extractive Occupations

- 613 Supervisors extractive occupations
- 614 Drillers oil well
- 615 Explosives workers
- 616 Mining machine operators
- 617 Mining occupations not elsewhere classified

Precision Production Occupations

628 Supervisors - production occupations

Precision metalworking occupations

- 634 Tool and die makers
- 635 Tool and die maker apprentices
- 636 Precision assemblers metal
- 637 Machinists
- 639 Machinist apprentices
- 643 Boilermakers
- 644 Precision grinders, filers, and tool sharpeners
- 645 Patternmakers and model makers metal
- 646 Layout workers
- 647 Precious stones and metals workers (jewelers)
- 649 Engravers metal
- 653 Sheet metal workers
- 654 Sheet metal worker apprentices
- 655 Miscellaneous precision metalworkers

Precision woodworking occupations

- 656 Patternmakers and model makers wood
- 657 Cabinetmakers and bench carpenters
- 658 Furniture and wood finishers
- 659 Miscellaneous precision woodworkers

Precision textile, apparel, and furnishings machine workers

- 666 Dressmakers
- 667 Tailors
- 668 Upholsterers
- 669 Shoe repairers
- 674 Miscellaneous precision apparel and fabric workers

Precision workers - assorted materials

- 675 Hand molders and shapers, except jewelers
- 676 Patternmakers, layout workers, and cutters
- 677 Optical goods workers
- 678 Dental laboratory and medical appliance technicians
- 679 Bookbinders
- 683 Electrical and electronic equipment assemblers
- 684 Miscellaneous precision workers not elsewhere classified

Precision food production occupations

- 686 Butchers and meat cutters
- 687 Bakers
- 688 Food batchmakers

Precision inspectors, testers, and related workers

- 689 Inspectors, testers, and graders
- 693 Adjusters and calibrators

Plant and System Operators

- 694 Water and sewage-treatment plant operators
- 695 Power plant operators
- 696 Stationary engineers
- 699 Miscellaneous plant and system operators

OPERATORS, FABRICATORS, AND LABORERS

Machine Operators, Assemblers, and Inspectors

Machine operators and tenders, except precision

Metalworking and plasticworking machine operators

- 703 Lathe and turning machine setup operators
- 704 Lathe and turning machine operators
- 705 Milling and planing machine operators
- 706 Punching and stamping press machine operators
- 707 Rolling machine operators
- 708 Drilling and boring machine operators
- 709 Grinding, abrading, buffing, and polishing machine operators
- 713 Forging machine operators
- 714 Numerical control machine operators
- 715 Miscellaneous metal, plastic, stone, and glass working machine operators
- 717 Fabricating machine operators not elsewhere classified

Metal and plastic processing machine operators

- 719 Molding and casting machine operators
- 723 Metal plating machine operators
- 724 Heat treating equipment operators
- 725 Miscellaneous metal and plastic processing machine operators

Woodworking machine operators

- 726 Wood lathe, routing, and planing machine operators
- 727 Sawing machine operators
- 728 Shaping and joining machine operators
- 729 Nailing and tacking machine operators
- 733 Miscellaneous woodworking machine operators

Printing machine operators

- 734 Printing press operators
- 735 Photoengravers and lithographers
- 736 Typesetters and compositors
- 737 Miscellaneous printing machine operators

Textile, apparel, and furnishings machine operators

- 738 Winding and twisting machine operators
- 739 Knitting, looping, taping, and weaving machine operators
- 743 Textile cutting machine operators
- 744 Textile sewing machine operators
- 745 Shoe machine operators
- 747 Pressing machine operators
- 748 Laundering and dry cleaning machine operators
- 749 Miscellaneous textile machine operators

Machine operators - assorted materials

- 753 Cementing and gluing machine operators
- 754 Packaging and filling machine operators
- 755 Extruding and forming machine operators
- 756 Mixing and blending machine operators
- 757 Separating, filtering, and clarifying machine operators
- 758 Compressing and compacting machine operators
- 759 Painting and paint spraying machine operators
- 763 Roasting and baking machine operators food
- 764 Washing, cleaning, and pickling machine operators
- 765 Folding machine operators
- 766 Furnace, kiln, and oven operators, except food
- 768 Crushing and grinding machine operators
- 769 Slicing and cutting machine operators
- 773 Motion picture projectionists
- 774 Photographic process machine operators
- 777 Miscellaneous machine operators not elsewhere classified
- 779 Machine operators, not specified

Fabricators, assemblers, and handworking occupations

- 783 Welders and cutters
- 784 Solderers and brazers
- 785 Assemblers
- 786 Hand cutting and trimming occupations
- 787 Hand molding, casting, and forming occupations
- 789 Hand painting, coating, and decorating occupations
- 793 Hand engraving and printing occupations
- 795 Miscellaneous handworking occupations

Production inspectors, testers, samplers, and weighers

- 796 Production inspectors, checkers, and examiners
- 797 Production testers
- 798 Production samplers and weighers
- 799 Graders and sorters, except agricultural

Transportation and Material-moving Occupations

Motor vehicle operators

- 803 Supervisors motor vehicle operators
- 804 Truck drivers
- 806 Driver-sales workers
- 808 Bus drivers
- 809 Taxicab drivers and chauffeurs
- 813 Parking lot attendants
- 814 Motor transportation occupations not elsewhere classified

Transportation occupations, except motor vehicles

Rail transportation occupations

- 823 Railroad conductors and yardmasters
- 824 Locomotive operating occupations
- 825 Railroad brake, signal, and switch operators
- 826 Rail vehicle operators not elsewhere classified

Water transportation occupations

- 828 Ship captains and mates, except fishing boats
- 829 Sailors and deckhands
- 833 Marine engineers
- 834 Bridge, lock, and lighthouse tenders

Material-moving equipment operators

- 843 Supervisors material-moving equipment operators
- 844 Operating engineers
- 845 Longshore equipment operators
- 848 Hoist and winch operators
- 849 Crane and tower operators
- 853 Excavating and loading machine operators
- 855 Grader, dozer, and scraper operators
- 856 Industrial truck and tractor equipment operators
- 859 Miscellaneous material-moving equipment operators

Handlers, Equipment Cleaners, Helpers, and Laborers - Not Elsewhere Classified

- 864 Supervisors handlers, equipment cleaners, and laborers not elsewhere classified
- 865 Helpers mechanics and repairers

Helpers - construction and extractive occupations

- 866 Helpers construction trades
- 867 Helpers surveyor
- 868 Helpers extractive occupations
- 869 Construction laborers
- 874 Production helpers

Freight, stock, and material handlers

- 875 Garbage collectors
- 876 Stevedores
- 877 Stock handlers and baggers
- 878 Machine feeders and offbearers
- 883 Freight, stock, and material handlers not elsewhere classified
- 885 Garage and service station related occupations
- 887 Vehicle washers and equipment cleaners
- 888 Hand packers and packagers
- 889 Laborers, except construction

ARMED FORCES

- 903 Commissioned officers and warrant officers
- 904 Noncommissioned officers and other enlisted personnel
- 905 Military occupation rank not specified

109

	Replicate weight for balanced repeated replication (BRR) bootstrap variance estimation. These weights may be input into variance estimation software which uses the balanced repeated replication method. Rounded to 4 significant decimal places. Maximum number of digits is 8, including the decimal point.
